PACKDUPFIT.COM

Durable and Lightweight Upfitting Systems

Smart Design.

Solid Performance.

User-Centric.

Built for upfitters, trusted by fleets, and
ready for the demands of modern technicians

Upfitting Made Smarter

We focus on one thing: building high-quality upfitting products that upfitters trust and end-users ask for by name.

About the Team

Our team brings decades of real-world, hands-on upfitting knowledge. That experience guides everything we engineer, so you get equipment that installs right, holds up under pressure, and helps your people stay efficient. This isn't theory. It's performance proven in thousands of builds.

About Packd™

Built by upfitters, the team at Packd saw firsthand where the market was falling short. Too often, equipment manufacturers weren't providing the support upfitters needed to work efficiently and confidently. That gap is why Packd was created. Rooted in real upfitting experience, every Packd product is engineered around four core principles: user-focused design, durability, efficiency, and sustainability.

User-focused Design

- Maximizes the technician's time
- Optimizes ergonomics for daily trade work
- Designed to enhance productivity, comfort and safety

Unmatched Durability

- Built for long-term use
- Research-driven design informed by real-world trade applications
- Rigorously tested in demanding work environments

Innovative Efficiency

- Industry-leading strength-to-weight ratios
- Lightweight design supports fuel efficiency and extended EV range

Sustainable

- Base materials made with up of 75% recycled content
- Fully recyclable at end of life
- Reduced environmental footprint

Packd Systems

Upfit smarter, maximize space and productivity with our full range of modular upfit solutions

Proudly Designed & Manufactured in North America

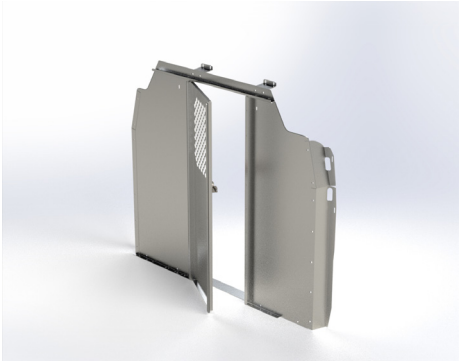
12-Year Warranty

Easy Assembly & Installation

Shelving

The foundation of every productive work vehicle starts with shelving. Packd offers modular shelving systems in multiple heights, designed to fit low, mid, & high-roof cargo vans while maximizing usable space and organization.

page 4



Partitions

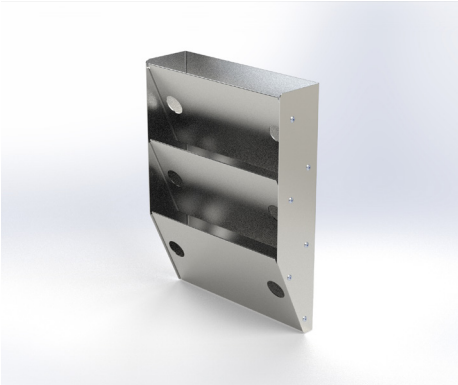
Packd partitions go beyond safety and compliance. Designed for real-world demands, they improve cab comfort, protect occupants, and help separate cargo efficiently. Choose from contoured, vertical, and composite designs.

page 10

Storage

Packd's storage solutions keep tools, parts, and equipment secure, organized, and easy to access. Choose from partskeepers, tank holders, lockers, cab boxes, and tool drawers.

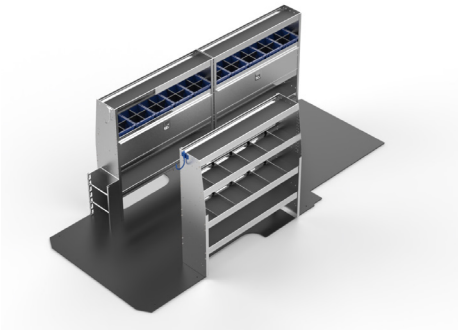
page 16



Accessories

Complete your setup with Packd accessories designed to enhance organization, accessibility, and efficiency.
From shelf dividers to document holders, each accessory is built to integrate seamlessly with Packd systems.

page 24



Van Packages

Packd van packages are designed to reduce install time and eliminate guesswork. These packages deliver a complete, work-ready solution for cargo vans.

page 28

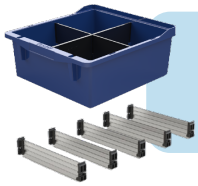
Ideal for low, medium, and high roof cargo vans

A great solution for truck caps!

SHELVING

Packd Shelving

FEATURES AND BENEFITS



MAXIMIZE THE EFFICIENCY OF YOUR SHELVING SYSTEM WITH SHELVING ACCESSORIES

page 10

250 lbs.
carrying capacity per shelf

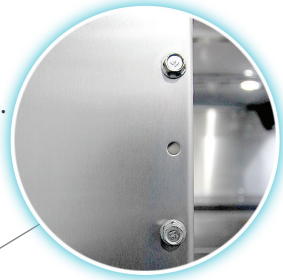
up to 60 %
lighter than steel

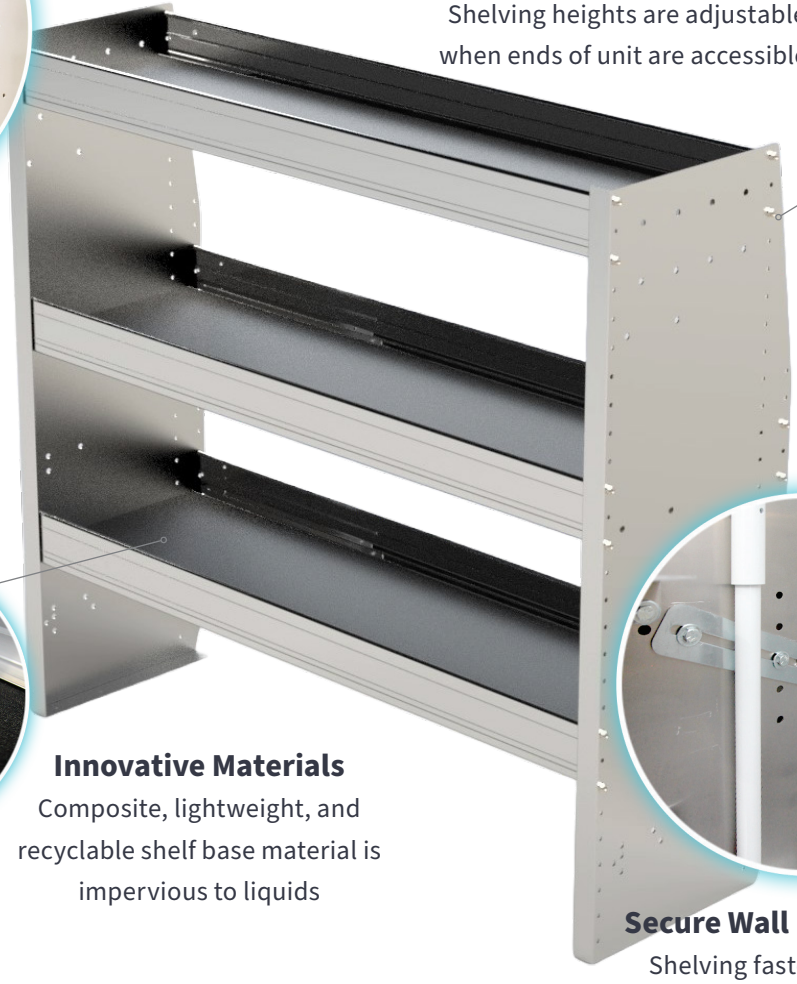
up to 500 lbs.
weight savings per van

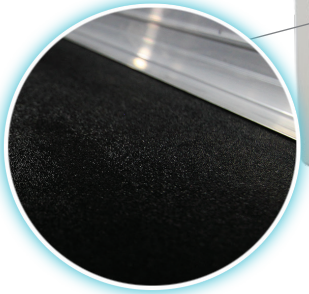
5 % Savings x Number of Vans in your Fleet = Real Impact.
annual fuel savings

Seamless Assembly
Raised lines on extrusion minimize aesthetic damage to extrusion during assembly.

Adjustable Shelving Heights
Shelving heights are adjustable when ends of unit are accessible.







Innovative Materials
Composite, lightweight, and recyclable shelf base material is impervious to liquids

Secure Wall Installation
Shelving fastened to wall of vehicle using threaded inserts for a secure, rattle-free installation that lasts.

Packd Shelving System

PACKD BINS

Add these bins to your Packd Shelving System for a seamless fit and smarter organization. Durable, lightweight, and self-centering, Packd bins keep your mobile workshop (and even your garage) organized and efficient.

Their proven heavy-duty design stands up to the daily demands of the trades. Included dividers keep small parts and hardware easy to find, while the stackable design makes it easy to bring exactly what you need to the jobsite.

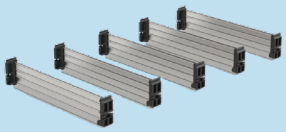
SKU: PBS-11,-12,-14

PACKD DIVIDERS

Tired of your equipment getting mixed up? These movable Packd dividers are infinetely adjustable and create a solid separation within your shelving; no drilling required. Designed to keep tools and parts organized, they install easily and adjust as your needs change.

Available in Tall (TDS) and Compact (CDS) versions, with multiple depth options to match different shelving tray sizes. Sold in sets of five, with mounting clips included.

TDS Series
Depth: 11”, 12”, 14”
SKU: TDS-11,12,14



CDS Series
Depth: 11”, 12”, 14”,16”,18”
SKU: CDS-11,12,14,16,18

Packd Shelving System

ACCESSORIES

LOCKING DOORS

Add locking doors to your Packd Shelving Units to improve security and keep your belongings protected at all times. Integrates seamlessly with Packd shelving, this is an easy install.

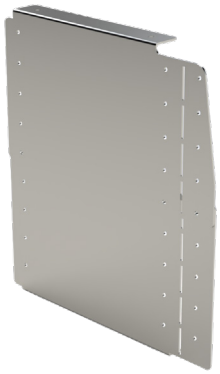
Available in multiple heights and lengths to match different shelving configurations.

SD10 Series
Height: 9.84”
Width: 33”, 45”, 57”
SKU: SD1033, SD1045, SD1057

SD11 Series
Height: 11.42”
Width: 33”, 45”, 57”
SKU: SD1133, SD1145, SD1157

SD13 Series
Height: 13”
Width: 33”, 45”, 57”
SKU: SD1333, SD1345, SD1357

*20”H doors also available for oversized requirements



SHELVING BLOCKER

The adjustable shelving blocker creates a secure compartment, ideal for long shelf units in combination with locking doors.

What's the right partition for you?

TO HELP YOU CHOOSE THE RIGHT VAN PARTITION, ASK YOURSELF THE QUESTIONS BELOW. EACH ONE HIGHLIGHTS IMPACTS TO YOUR COMFORT, SAFETY & WORKFLOW.

Questions	Suggestion
How many hours do I drive each day?	If you spend long hours behind the wheel, partition shape matters. Choose contoured over straight. A contoured design provides additional space for proper seat adjustment and driver comfort.
What climate do I work in year round?	Composite partitions provide improved thermal insulation. For colder climates, composite materials help regulate cab temperature.
Do I carry chemicals or oils?	A solid partition helps contain fumes and spills, keeping the cab safer and more comfortable.
Is rear visibility important?	If visibility matters, choose a partition with a window. If privacy or containment is a priority, go solid.
How often do I access the cargo area?	Frequent access from the cab is best supported by walk-through partitions (P30) or swing-door options (P50).

Packd Partitions

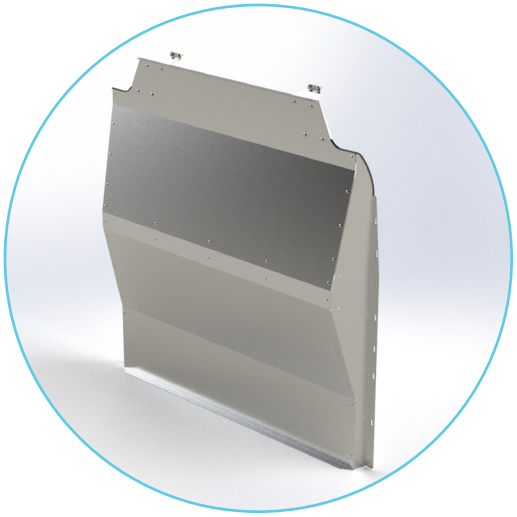
CONTOURED ALUMINUM PARTITIONS

P10 & P11

ALUMINUM partitions prioritize strength, impact resistance, and lightweight. They are commonly chosen when carrying heavy tools, or equipment where maximum driver protection and durability are required.

Solid Contoured (P10 Series)

SKU	Weight (lbs)	Compatibility
P10-FTH	57	Ford Transit High Roof
P10-FTM	53	Ford Transit Mid Roof
P10-FTL	41	Ford Transit Low Roof
P10-GMS	40	GMC / Chevrolet



Solid Contoured w/ Window (P11 Series)

SKU	Weight (lbs)	Compatibility
P11-FTH	59	Ford Transit High Roof
P11-FTM	55	Ford Transit Mid Roof
P11-FTL	43	Ford Transit Low Roof
P11-GMS	42	GMC / Chevrolet

Packd Partitions

CONTOURED COMPOSITE PARTITIONS

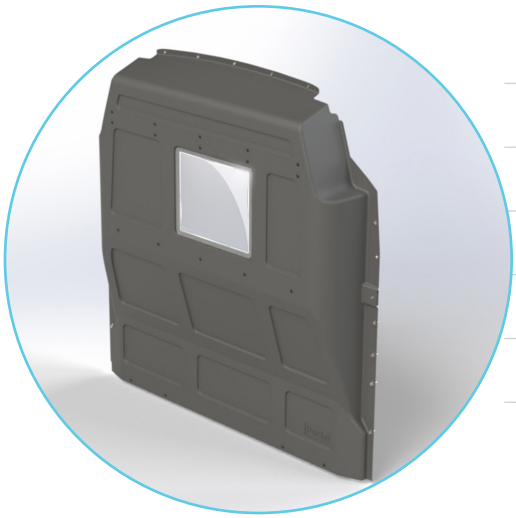
P60 & P62

COMPOSITE partitions provide improved thermal insulation and noise reduction, helping create a quiter and more comfortable cab environment, especially beneficial for long drive times or extreme temperatures.

Solid Contoured Composite (P60 Series)

SKU	Weight (lbs)	Compatibility
P60-FTH	55	Ford Transit High Roof
P60-FTM	50	Ford Transit Mid Roof
P60-MSH	50	Sprinter High Roof
P60-MSL	50	Sprinter Low Roof
P60-RP	50	Ram Promaster

Solid Contoured Composite w/ Window(P62 Series)



SKU	Weight (lbs)	Compatibility
P62-FTH	58	Ford Transit High Roof
P62-FTM	51	Ford Transit Mid Roof
P62-MSH	50	Sprinter High Roof
P62-MSL	50	Sprinter Low Roof
P62-RP	50	Ram Promaster

STORAGE SYSTEMS

Category includes: Tank Storage, Partskeeper Storage Units, Lockers, Cab Boxes, and Tool Drawer System

Packd uses stainless steel locking paddle latches across all of its storage systems.
This delivers added durability, security, and weather resistance.

Packd Storage

TANK HOLDERS

SAFETY COMES FIRST, SO DOES COMPLIANCE

When it comes to tank holders, compliance and safety are essential to staying efficient on the job. That's why these tank holders are designed to meet safety regulations for transporting nitrogen, B-tanks, and refrigerant tanks, each of which can pose serious risks if not properly secured.

Non-compliance doesn't only put technicians at risk; it also increases the likelihood of vehicles being taken off the road due to safety violations.

Integrated Tank Storage

- All-in-one storage for tanks and other essential tools and equipment

Refrigerant Tank Holders

- Available for small and large refrigerant cylinders

Vertical Tank Holders

- Packd offers b-tank, nitrogen tank holders, and multiple adjustable tank holders

Additional Configuration Tank Holders

- For added flexibility, attach these tank holders to your shelving, partition, or wall

Packd Storage

TANK HOLDERS

Brand Story

UPFIT SMARTER

Why the Packd name?

Because it reflects exactly what we design, purpose-built equipment engineered to function as one complete system.

Packd systems are streamlined and thoughtfully developed by people who've worked in the field.
That means every component is job-ready, built with intention, and designed to stand up to real-world demands.

/pakt/

Packd means mission-ready. Fully equipped. Nothing wasted.

It represents a state of agile readiness. No excess. No filler. No compromise. Just smart systems designed to help upfitters lay the groundwork for efficient, field-ready technicians.
